# We create solutions. Even in space.

With over 2 decades of experience in electronics and engineering AES is looking upward. AES began doing businesses in the aviation sector, in 1997. 13 years later, AES reached out into the space industry. All of our innovation reflects the extensive knowledge we have secured over the years.

AES provides state-of-the-art, comprehensive products and services for internationally emerging areas such as the space, telecommunication, and energy conversion/storage industries. We develop and design custom, goal-oriented solutions, helping you create ideal systems geared to your needs.

AES meets and exceeds the high demands of the aviation industry with consistent high quality and its continual commitment to the research and development of its products.

Inventing systematic solutions  
for challenging environments  
since 1997

**Beyond 5G:  
space and industrial  
applications**

**Power conditioning and  
distribution units**

In  
I  
te

**Innovative  
lighting  
technology**

**Wireless sensors  
for extreme  
conditions**

**Ultra thin and  
lightweight harnesses  
for delicate surroundings**
